Overexposure -- Toluene Diisocyanate ( <0.1%): Skin, Eyes  
A known skin sensitizer

CARCINOGENICITY...

NTP? N/E | IARC Monographs? N/E | OHSA? NO

Normal use of this product does not produce dust. Sanding dried material could generate trace amounts of silica (quartz) which is a suspect human carcinogen by IARC.

EFFECTS OF OVEREXPOSURE

Eyes: Can cause irritation, redness, tearing and blurred vision.

Skin: Repeated contact can cause moderate irritation, dermatitis and possible sensitivity. Allergic reactions are possible.

Inhalation: Headaches, dizziness, nausea, decreased blood pressure, irritation, coughing, chest discomfort. See Chronic below.

Ingestion: Can cause gastrointestinal irritation, nausea.

FIRST AID MEASURES

Eyes: Flush with large amounts of water for at least 15 minutes lifting eyelids occasionally; get prompt medical attention

Skin: Wash thoroughly with soap and water; apply a mild skin cream. Remove contaminated clothing. Rubbing alcohol may help to remove uncured adhesive.

Inhalation: Remove affected person to fresh air; if breathing is difficult, administer oxygen; if breathing has stopped, give artificial respiration. Get medical attention.

Ingestion: DO NOT INDUCE VOMITING! Get immediate medical attention.

CHRONIC HAZARDS

CHRONIC HAZARDS: Preexisting respiratory or skin conditions may be aggravated by exposure. This product contains an isocyanate. Persons with a history of exposure to isocyanates may experience reddening swelling, rash or blisters. Such individuals could also experience chemical asthma, and non-specific asthmatic conditions. Skin and respiratory sensitization can result from repeated exposures to isocyanates. For most individuals these effects are reversible. Normal use of this product does not produce dust. Sanding dried material could generate trace amounts of silica (quartz ) which is a suspect human carcinogen (IARC group 2A ).

Repeated and prolonged occupational overexposure to crystalline silica may cause silicosis, a progressively disabling lung disease.

NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain, nervous system, liver or kidney damage or may cause cardiac arrhythmia. INTENTIONAL misuse of this product by deliberately inhaling its vapors may be harmful or fatal.
